Self Definition

I'm a very persistent, kind, and hardworking person and confident working independently or as part of a team. When I face a problem I don't give up so easily, I'm very patient and a fast learner. Through my work & projects I can say I'm a team player, I like working with a team, and I know we can accomplish something far greater together so that's why I think teamwork is essential. I like to help others but am not afraid to ask for help either. My hobbies are Chess, TableTennis, and playing video games like League of Legends

Strength

I can work very well in a team, I am a team player but i also have some experience with front-end technologies. i can take feedback very well and i'm very efficient with Python, JavaScript and HTML and a few template engine(thymeleaf, Jinja), but I can learn new things as well. I am very persistent and don't give up so easily

Hard Skills

PHP | Python | Javascript | Java | Git | Bootstrap | Heroku

HTML5 | PostgreSQL | CSS3 | aws | Laravel | MariaDB | Node JS
